

Proposed Window Standards

Design, Style and Configuration

- Replacement windows must match the original window operating style (for example, sliding windows replaced with sliding windows) and fit within the existing window opening.
- Window conversions (from one style to another style (i.e. slider to picture)) or enlargements require the submission of a DRB application to RA.
- Window proportions and appearance should remain consistent with the original design of the home.
- Decorative grids, grilles, muntins, or divided-light patterns are not permitted.
- Window styles should be consistent throughout the home.
- When screens are installed, use screen frames that match the window frame color.

Materials

- Any manufacturer may be used.
- Window frames must be constructed of durable exterior-grade materials, including wood, clad wood, vinyl, fiberglass, composite materials, or equivalent products.

Colors

Approved exterior frame colors include:

- Beige
- Brown
- Bronze
- Colors matching existing siding or trim

Owners proposing a siding- or trim-matched color should submit a color sample to RA staff for verification.

Exterior white window frames are not permitted.

All windows on the home should have a consistent exterior frame color.

Trim and Capping

- Trim and capping should match the window frame color.
- Trim and capping materials should be compatible with the window frame.
- Exterior capping shall not exceed 2 inches in visible width.

Patio Door Standards

Permitted Patio Door Types

The following patio door types are permitted:

- Two-panel sliding glass doors.
- French doors.

Conversion from an existing sliding glass door to French doors is permitted without a DRB application when all requirements of these standards are met.

General Requirements

All patio doors must:

- Be installed within the existing structural opening.
- Maintain the existing opening size and location.

- Use clear glass.
- Have no decorative grids, divided lights, etching, frosting, or decorative glass treatments.
- Have no sidelights or transoms.
- Match the exterior frame color used on the home's windows.
- Comply with the trim and capping requirements below.

Where multiple patio doors exist on the same elevation, they should be consistent in color, frame profile, glass appearance, and overall design.

Materials

- Any manufacturer may be used.
- Door frames must be constructed of durable exterior-grade materials, including wood, clad wood, vinyl, fiberglass, composite materials, or equivalent products.

Colors

Approved exterior frame colors include:

- Beige
- Brown
- Bronze
- Colors matching existing siding or trim

Owners proposing a siding- or trim-matched color should submit a color sample to RA staff for verification.

Exterior white patio door frames are not permitted.

Patio doors and windows should have consistent exterior frame colors throughout the home.

Trim and Capping

- Trim and capping should match the patio door frame color.
- Trim and capping materials should be compatible with the door frame
- Exterior capping shall not exceed 2 inches in visible width.

Sliding Glass Doors

Sliding glass doors must:

- Be two-panel configurations.
- When screens are installed, use screen frames that match the patio door frame color.

French Doors

French doors must:

- Be installed within the existing opening.
- Not include additional glass side panels or transoms.
